Neighborhood Stabilization Program Grants

The Neighborhood Stabilization Program (NSP) provides grants to address the problems associated with homes that have been foreclosed upon and are creating economic problems for their communities.

The HSP3 mapping tool now provides a summary HSP3 score for all projects drawn. Click on "View Projects", which will list all of the projects (target areas) that have data calculated. It shows the HSP3 score for each target area along with the total estimated housing units in that area. At the bottom of the list is a sum of all housing units in all target areas and the HSP3 score for all target areas drawn. Grantees are advised to know their state minimum and if the summary score is less than the state minimum the grantee should delete, add, or revise target areas. Note that if you delete or add, the tool only recalculates after you close the "View Projects" box and reopen it. HUD also advises grantees to think carefully about the size of their target areas in total. If those target areas have a very large number of total housing units relative to the dollars available, HUD will likely ask that the grantee reduce the number and/or size of their target areas.
